

THE COMPLETE GUIDE

Revised edition

Objective: Carry the ball to the end zone without being touched or dropping the ball to the ground.

VS

OFFENSIVE TEAM

DEFENSIVE TEAM

The offensive team has 3 players on the field while the defensive team is sending 2 players.

In a 6 against 6 game, 3 offensive players and 4 defensive players are waiting.

NEW PLAYERS

After each try, a new ball is immediately put into play on the same initial starting line, and 3 new offensive and 2 new defensive players enter the field. Offensive players always start on the same line after each play.

OLD PLAYERS

Each team consists of 5-6-7, or 8 players. While the official number is 6 players per team, 7 is also acceptable. The offensive team comprises three players, and the defensive team sends two players.

A successful try = 1 point

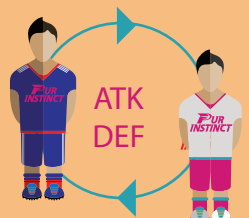

There are only two possible outcomes: either you score, or you're out. Offensive players need to find a way to score each time, and being touched near the end zone holds no value.

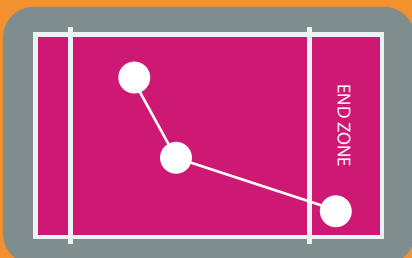

A unsuccessful try = 1 out

3x

After 3 outs, offense and defense switch.

The ball handler is always allowed to run with the ball. Different types of passes, off-sides, and point systems are included, depending on the skill level of the group

HOW TO START AN ATTEMPT

OFFENSIVE LINE

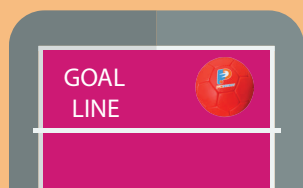

The ball is placed on the ground in the middle of the starting offensive line

The game begins with the offensive players behind the offensive line and the defensive players behind the defensive line

The defense is allowed to blitz and touch the ball handler anywhere (no safe zone)

HOW TO SCORE

Run with the ball towards the goal line

The ball must cross the goal line before the ball carrier gets tagged

Catch the ball in the goal line

If an interception occurs, the game continues. The team in possession of the ball (composed of 2 players) attack the other 3 players to return to the starting line.

HOW TO MAKE AN OUT

Touch the ball carrier with the hand

The ball hits the ground

Intercept a pass

The ball carrier touches the side line

Prohibited

- A player may not make a pass to himself
- Some passes are prohibited according to the level of difficulty played

In a duel to catch a ball, the defensive player must demonstrate an actual intent to touch the attacker to be regarded as an out

REDIRECTION (DURING A PASS RECEPTION)

Redirections are really useful as they can extend a play and allow the offensive player to play without getting touched. The mastery of the game is often seen in players who become extremely good at timing the perfect redirection. At a high level of difficulty, redirections become a way to score and bypass other rules. At a lower level of difficulty, redirections can result in more points being scored!

The direct hits are not counted as a possession of the ball

Hitting the ball before catching it, like in a volley, is allowed. Players can use their fist, foot, or arms but not their open hand. Open hands on redirection are always accepted when going backward, but a player can be touched as it is considered a possession. At lower skill levels, open hands are allowed for redirection.

DEFINITION

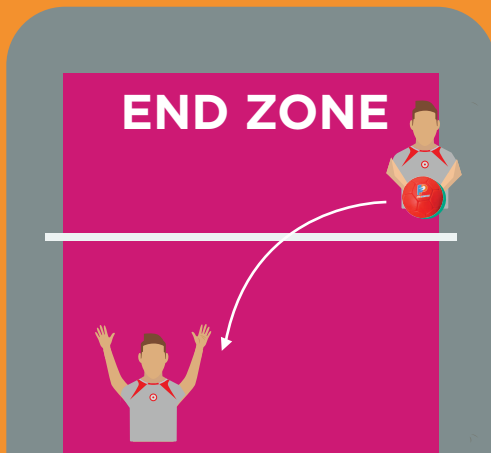

Hitting the ball before catching it. Like a volley. You can use your fist, foot, arms, but not your open hand

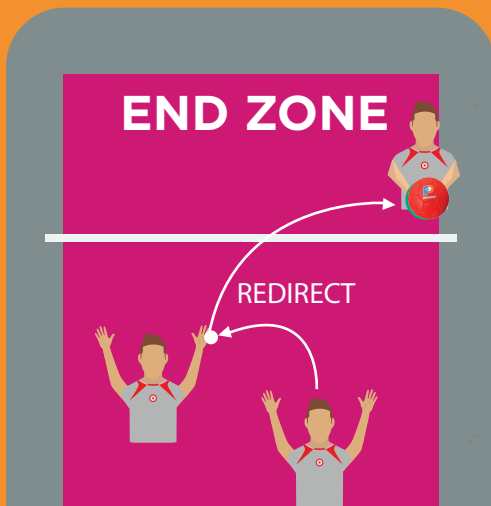

END ZONE ACTIONS

06

At high levels of difficulty

A player cannot catch a poke in the end zone. He must catch it before the end zone. If a player is receiving a poke in the end zone, he is allowed to redirect the pass.

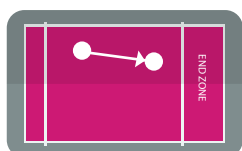

From level 0 to 9!

A player is allowed to catch in the end zone all passes coming from a redirect hit.

Depending of level of difficulty

A player can catch a kick in the end zone if the receiver was outside the end zone at the time of the kick.

Defense is allowed to intercept a "illegal" pass going forward. During an interception, there's no end zone special rules. Therefore, players are allowed to receive a poke in the end zone.

TRANSITIONS

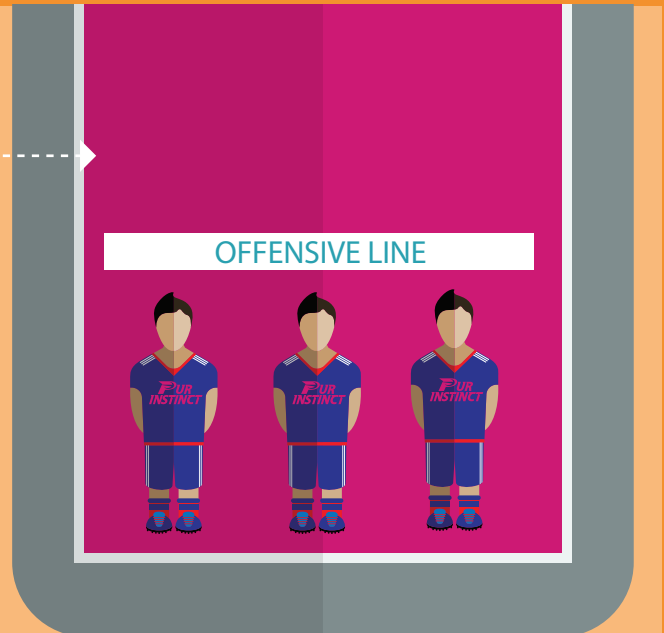

04

Transitions are often the most difficult and challenging aspect of the game in terms of rules, leadership, and physical stamina. It requires teamwork and high attention to detail, and players can often become confused or disturbed. However, it is also one of the most fun aspects of the game and allows it to flow beautifully.

The team on defense must wait for every player to enter at least one foot in the box before sending two defenders.

A penalty (without stopping the play) is given to a team that enters too quickly. This can sometimes be a good play to prevent an easy score. Players must coordinate so that not a single toe is in the playing area before everyone gets in, and not more than two players enter the field.

In the case of three players on the field, the third player must immediately go back to the box. Teams are not allowed at any time to play with three players on defense. If the third player deliberately continues to play, a point will be given to the offensive team, and a yellow card will be given to the player at fault.

After three outs, the offensive and defensive teams must swap places. Players who were on the field during the last action can bypass the transition rules and go directly to the next box.

However, everyone must exit the playing field before entering the new box. All players in "waiting" must touch their own box and then run towards their respective pylon situated in front of their box across the field. Players must go around the pylons before entering the new box. Players on the field at the end of the last play do not need to go around any pylon.

For example, attackers who get touches can go directly to the defensive box, and defenders can run to the offensive box.

TRANSITIONS

04

On offense, during transition, players must touch the offensive box. Then the ball carrier can enter the offensive zone with the ball and put it on the ground.

They will be allowed to touch the ball and play only when all their team members have put at least one foot in the offensive box. Only three players must exit the box. The offensive team does not need to wait for the defensive team to be ready to play.

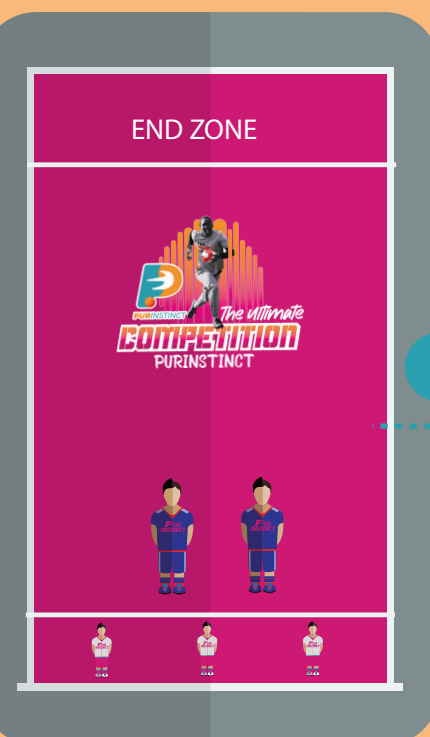

A defensive team can always decide to send two players onto the playing area if they feel it is necessary to stop the offensive team from scoring easily.

DEFENSIVE
START
AREA

However, they must face the consequences. At lower levels, a fourth "out" will be added, resulting in more opportunities for the offensive team to score. At higher levels of play, an "out" per player at fault (not in the box at the time the defense enters the playing area) will be added to the defensive struggle.

4

1

OFFENSIVE
START
AREA

2

3

TRANSITION AFTER 3 OUTS

There is a swap between the offensive team and the defensive team after 3 outs

DEFENSIVE
START
AREA

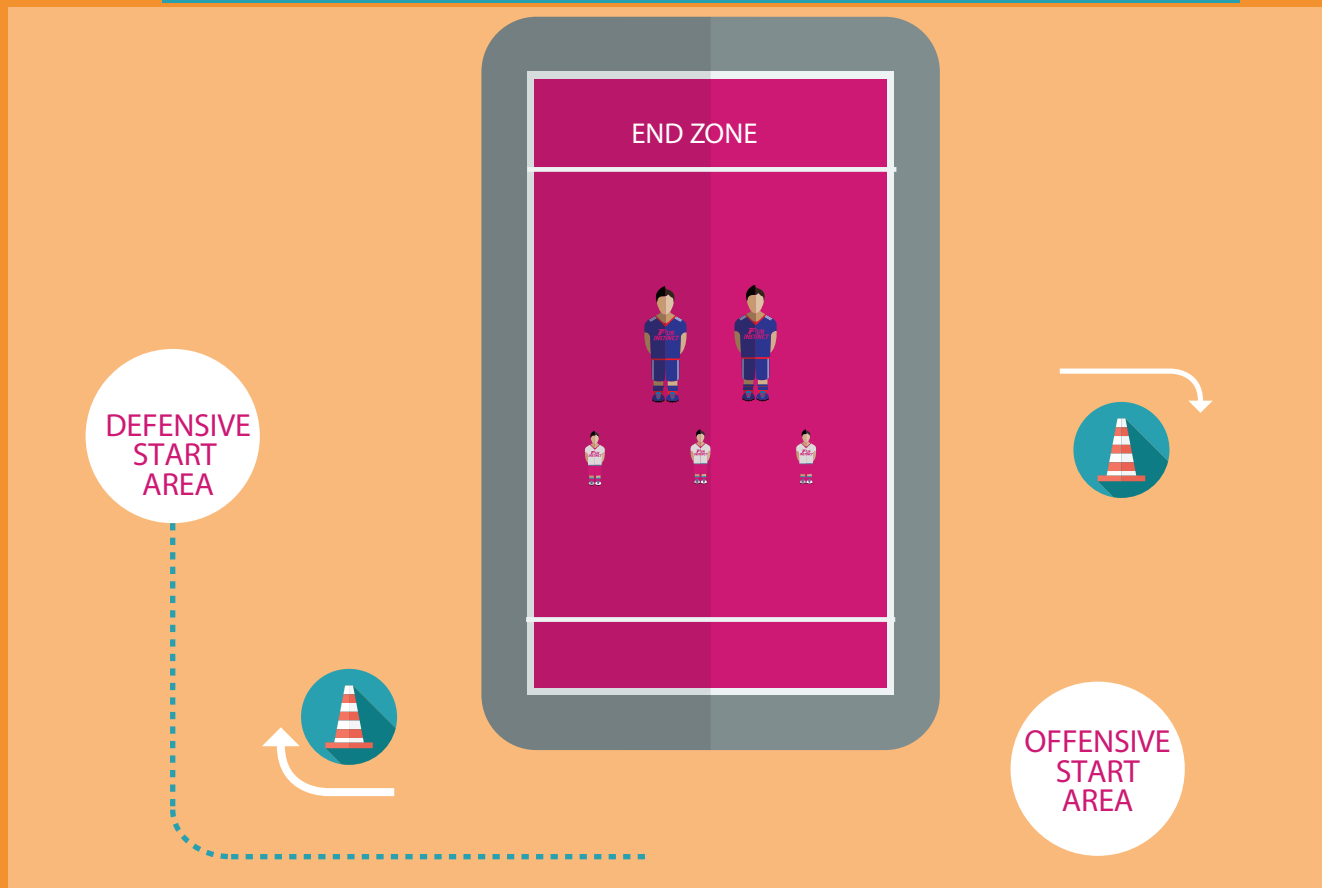

This transition on is done quickly so that the new offensive team may try to come into play before the defensive one

OFFENSIVE
START
AREA

TRADITIONAL “First pump”

Every game start with the traditional “fist pump” between two opposite players. It’s our way of saying “we recognize your value as an opponent”.

GLOBAL
COMPLETE RULES

06

DEPENDING ON LEVEL OF DIFFICULTY

OFFENSIVE LINE

All passes are permitted as long as the ball has not crossed the offensive starting line

OFFENSIVE LINE

Once the ball carrier goes across the offensive line, all pass forward are prohibited (except poke, kick and volley). Also, it's not possible to return behind the line to "retrieve the right" to throw forward.

Players can run with the ball, pass sideways (or back), punch (poke), or kick the ball as long as it does not touch the ground

DEPENDING ON LEVEL OF DIFFICULTY

They can receive a redirection

THE PLAYERS CANNOT WAIT FOR THE BALL IN THE FINAL AREA TO RECEIVE A POKE AND A KICK (THEY ARE CONSIDERED AS OFFSIDE)

All off-side rules and shot clock rules are not applied during an interceptions not

DEPENDING ON LEVEL OF DIFFICULTY

In order to receive a poke or a kick, a player must first wait for the hit and then enter the end zone in order to catch the ball

GLOBAL
COMPLETE RULES

06

The offensive team must score its attempt in 16 seconds or else it is deemed as a out.

The time starts when the previous try ends (no pause between attempts)

During an offensive and defensive offside, the time is reset to 16 seconds

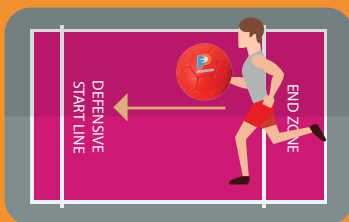

If the ball is in the air when the time is finished, the offensive team may attempt to catch the ball in the end zone. No running, no redirection is permitted after the «horn».

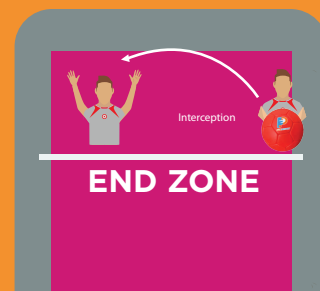

During a transition, the time begins when the defensive team is ready.

During an interception, the time is no longer in action for the remainder of the attempt.

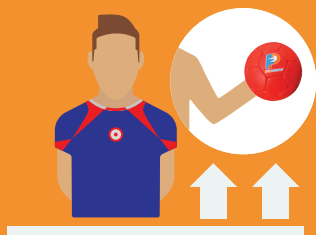

On a interception, player must try to bring the ball to the initial start zone without getting touched and without dropping the ball. No shot clock and no off-side on interceptions. If you score, it's worth 2 points and 1 out.

If a players does an interception in the end zone, he is allowed to pass the ball forward (same situation, inverse roles).

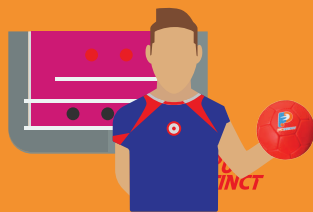

HOW TO MAKE A FAULT

OFFENSIVE

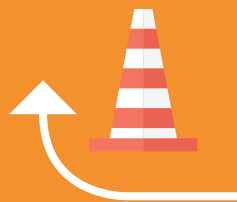

Crossing the offensive starting line before the ball is in play

Fault of transition

Touch the ball before all of the players are arrived in the departure zone

Fault of transition

Do not bypass the transition cone

It is forbidden for the offensive players to perform screens (or make contact) in order to undermine the movement of defenders.

The offending player must withdraw (the next attempt is conducted with 2 offensive players)
If two players make the mistake at the same time, one must exit the game.

An offensive player must withdraw (the next attempt is conducted with 2 offensive players)

An out is automatically reported.
Please note that a player can be naturally in the path of the defender without this being regarded as a screen

PROGRESSION (0-8) OF DIFFICULTY

Warm up

- ✓ On a half field, two players carry a ball and try to touch the other players (playing tag). Once they catch someone, they give up the ball and the new "tag" must carry the ball. We play until someone gets touched three times.
- ✓ On a half field, a team of 3 players passes one ball around and must tag other players while holding a ball.

PROGRESSION (0-8) OF DIFFICULTY

07

LEVEL 0:

- ✓ Allow the ball to touch the ground.
- ✓ No interception.
- ✓ No kicking the ball on the ground.
- ✓ Start by going 2 against 1 then proceed to 3 against 2.
- ✓ Use time and not outs before switching offense and defense.
- ✓ No live transition.

LEVEL 0.5:

- ✓ Warm up. Each team gets 1 minute of playing time on offense. Outs are not taken into account. Goal is to score as many points as possible

LEVEL 1:

- ✓ Ball is not allowed to touch the ground.
- ✓ Start 2 against 1. Proceed to 3 against 2.
- ✓ Use time and not outs before switching offense and defense.
- ✓ No live transition.
- ✓ Introduce the concept of interception.

*At every lower level,, you can add the 16 second rules for an extra "energy" to the sports

LEVEL 2:

- ✓ Introduce the concept of 3 outs and offensive and defensive penalties.
- ✓ Introduce live transition. Start by having every player go around transition cone.
- ✓ Proceed to have players on the field going straight to the offensive and defensive square on transition.

LEVEL 2.5:

- ✓ We add the 16 seconds shot clock. Don't hesitate to add this, it really add to the flow and the spirit of the game

LEVEL 3:

- ✓ No pass forward allowed to score a point.
- ✓ Player must decide to run, poke (punch the ball), kick or volley the ball (redirect hit).

LEVEL 3.25:

- ✓ Offensive players are allowed all the passes before the transition cone and the defensive box. Afterwards they must use the rules of Level 4 (no pass forward). They are allowed to go back behind the line and throw it forward.

LEVEL 4:

- ✓ No passes forward are allowed by the offensive players once the ball handler has crossed the offensive start line.

ALL LEVELS: YOU CAN ADD A 16 SECOND SHOTCLOCK. Don't hesitate to do this. It really stimulate the players and helps with the flow. The shotclocks start right away after a play (time is always running)

PROGRESSION (0-8) OF DIFFICULTY

07

LEVEL 5:

- ✓ To catch a poke in the end zone, a receiver must be outside the end zone at the time of the poke.

LEVEL 6:

- ✓ A time component of 16 seconds is added. The time starts as soon as a try is over.
- ✓ On transition, the shot clock starts when all defensive players are in the defensive square.

LEVEL 7:

- ✓ To catch a kick in the end zone, a receiver must be outside the end zone at the time of the kick.

LEVEL 8:

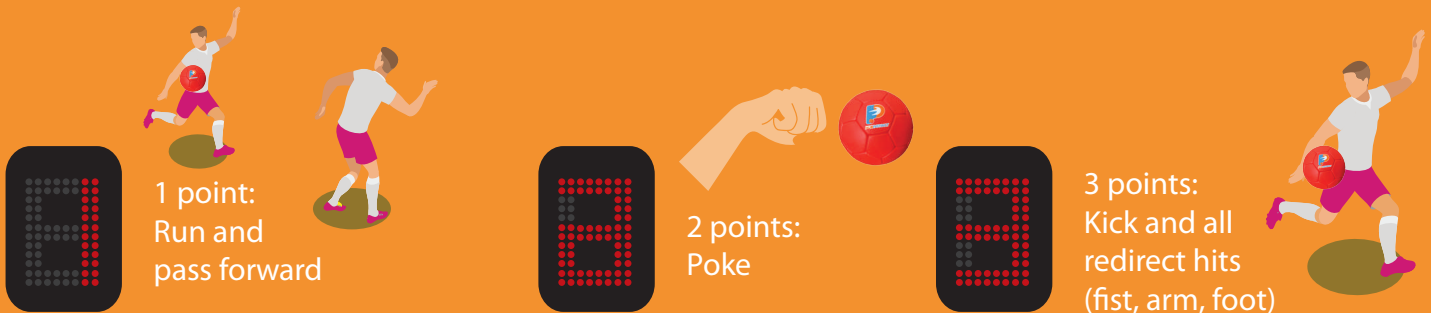

- ✓ No poke can be catch in the end zone.

LEVEL 9:

- ✓ All points are worth 1 except defensive points (2 points for an interception brought back to the initial line). The result of a kick catch in the end zone is a "next for two" meaning the next play of the offensive team will be worth two points if scored.

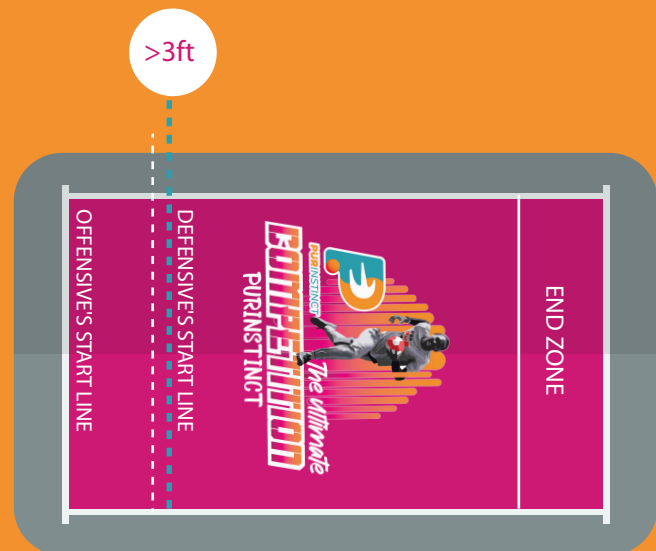

SCORING SYSTEM

In order to stimulate skills acquisition and decision making, you have the possibility to add a scoring system on offense.

DEFENSIVE LINE

In order to help decision making with beginners, the distance between offensive line can be much greater than 3 feet.

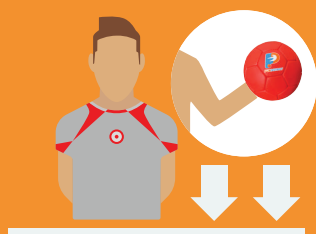

FIELD LENGTH

The field length can be adjusted to your gym reality. You can also decide to make it shorter on exterior field in order to reduce the amount of sprinting and running (which can be very high!)

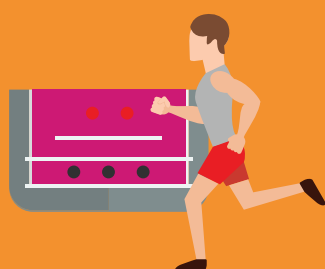

HOW TO MAKE AN OUT

DEFENSIVE

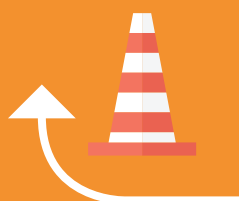

Crossing the defensive starting line before the ball is in play.

Fault of transition

Enter the field before all the players arrive in the departure zone

Fault of transition

Do not bypass the transition cone

It is prohibited for defenders to push or to hook deliberately an attacker who receives a pass in the goal line. The defender should attempt to play the ball. Otherwise, the point will be counted

Sending 3 players on the field
On transition between plays

An additional out will be counted (4 instead of 3). Play continue as defense withdraws one player without stopping the play

+1

An additional out will be counted (4 instead of 3)
